# SMOKED HEADLIGHT COVERS

(2018+ MUSTANG ALL)

---

## INSTALLATION INSTRUCTIONS

### CONTENTS

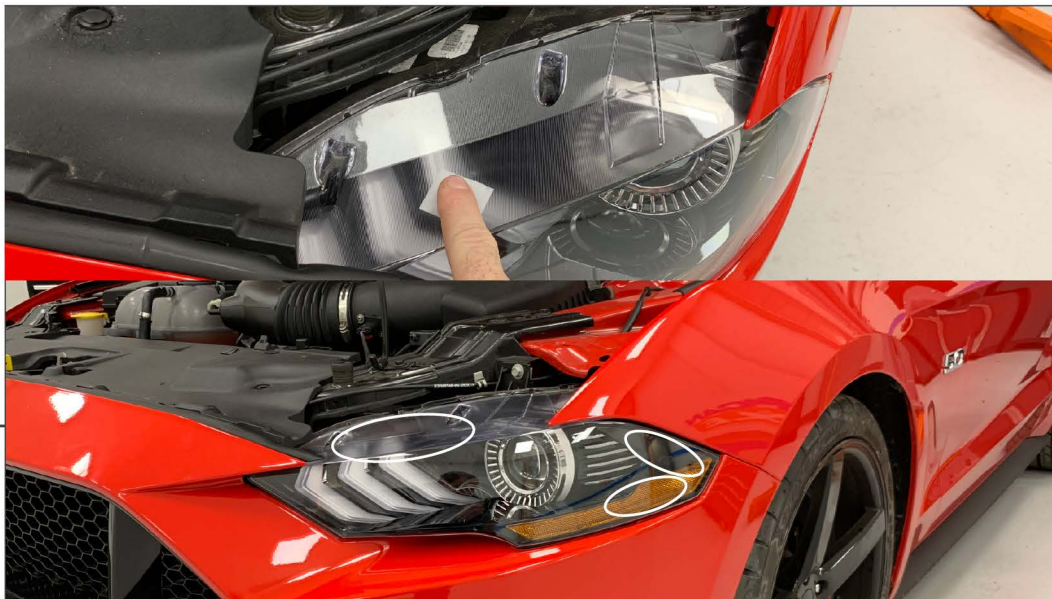

---

- (1) LH Headlight Cover
- (1) RH Headlight Cover
- (2) Alcohol Prep Pads

### TOOLS REQUIRED

---

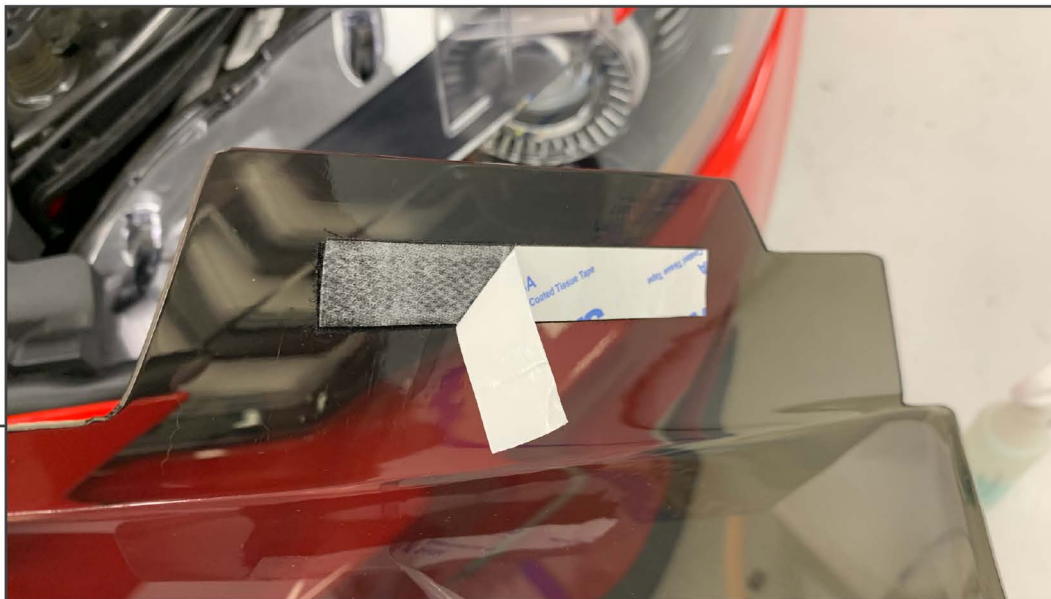

- Automotive Soap/Detailer
- Microfiber Towel

**STEP 1**

Begin by cleaning the front end of the vehicle with automotive soap and water, dry thoroughly. Use a supplied alcohol prep pad to clean the areas of the headlight lens where the Velcro adhesive will make contact.

**STEP 2**

Prior to removing the adhesive backing, test fit the lens cover several times to familiarize yourself with how it fits. Begin by tucking the inner portion of the lens cover under the bumper overhang. Then wrap the cover around the rest of the headlight.

**STEP 3**

Remove the adhesive backing to expose the Velcro's adhesive.

**STEP 4**

Carefully install the lens cover. Begin by tucking the inner edge under the bumper overhang. Hold the top edge/tape surface off the headlight so that it doesn't make contact prior to sticking the outer edge to the light. Apply firm even pressure to ensure proper adhesion to the vehicle. **IF THE COVERS NEED TO BE REMOVED AT ANY POINT FOR CLEANING, USE A PLASTIC TRIM REMOVAL TOOL OR SQUEEGEE TO RELEASE THE VELCRO. BE CAREFUL NOT TO PRY AGAINST THE HEADLIGHT SURFACE WHEN REMOVING THE COVERS. IF THIS IS UNAVOIDABLE, LAY A COUPLE STRIPS OF MASKING TAPE DOWN TO PREVENT SCRATCHES.**
