

LED LICENSE PLATE LIGHT

(2005-2009 MUSTANG)

INSTALLATION INSTRUCTIONS

CONTENTS

(1) LED License Plate Light

TOOLS REQUIRED

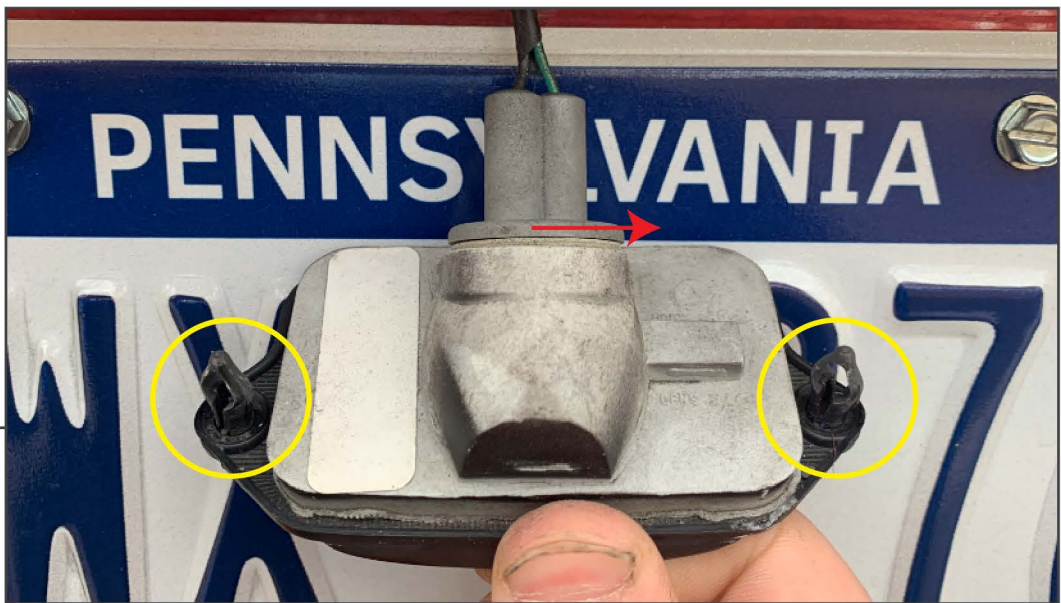

Phillips Screwdriver
Panel Removal Tool
Flathead Screwdriver

STEP 1

Remove the (2) Phillips plastic inserts using a Phillips screwdriver.

Note: If the head strips out, remove the clips using a panel removal tool.

STEP 2

Remove the license plate light housing from the bumper gently using a flathead screwdriver. Untwist the light socket from the light housing. Remove the (2) plastic clips from the light housing.

STEP 3

Remove the light bulb from the vehicle's license plate light socket. Plug the LED license plate light into the vehicle's light socket.

STEP 4

Transfer the plastic clips from the original license plate light to the LED license plate light. Re-assemble following steps 1-2 in reverse order.

Installation is now complete.
