---

**STEP 1**

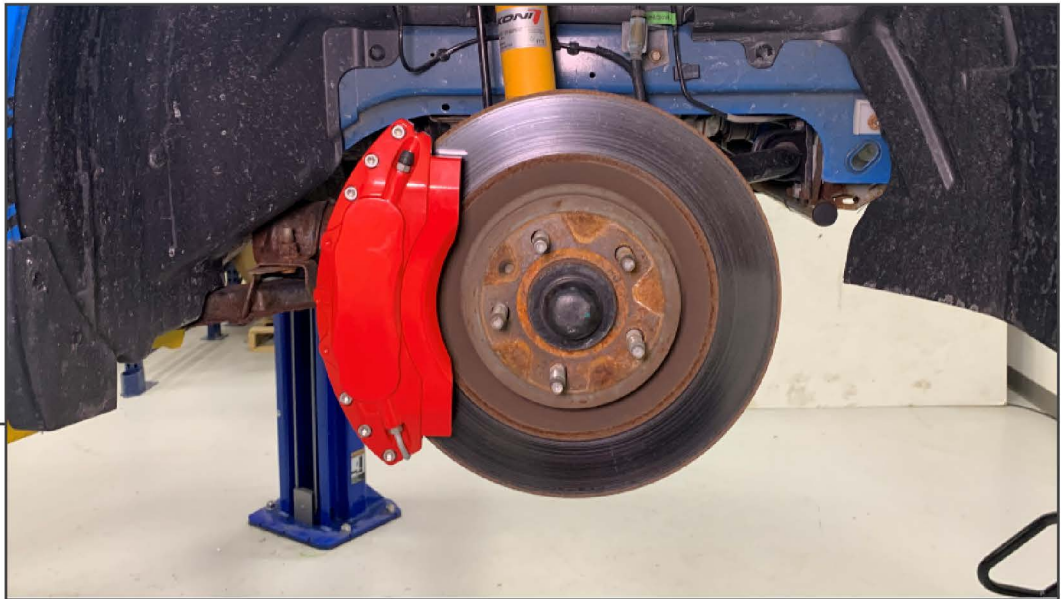

Safely lift and support the vehicle. Remove the wheels from the vehicle. Remove the upper bracket from the caliper cover by removing the pre-installed bolt. Align the bottom caliper cover bracket in between the brake caliper bracket and the brake rotor.

---

**STEP 2**

Align the top of the caliper cover with the top of the brake caliper. Place the caliper cover upper bracket in between the brake caliper bracket and the brake rotor. While lifting up on the caliper cover, install the bolt through the upper bracket and the caliper cover.

---

### STEP 3

Follow steps 1-2 on the remaining brake calipers. Safely lower the vehicle to the ground. See vehicle owners manual for proper lug nut torque procedure and specifications.

Installation is now complete.
