

LED LICENSE PLATE LAMPS

(2015-2021 MUSTANG)

INSTALLATION INSTRUCTIONS

CONTENTS

(2) LED License Plate Lamps

TOOLS REQUIRED

Flathead Screwdriver

STEP 1

Using a flathead screwdriver, pry on one side of the license plate light to press the plastic tab inward to release the side of the light. Once released, hinge the light out of the bumper. Unplug the electrical connector from the light.

STEP 2

Plug in the electrical connector into the new LED license plate lamp. Test light functionality.

STEP 3

Press the new LED license plate lamp into the bumper, ensuring the tabs click into place to secure the light into place. Repeat steps 1-3 to the remaining license plate light.

Installation is now complete.
