

LED THIRD BRAKE LIGHT

(2010-2014 MUSTANG)

INSTALLATION INSTRUCTIONS

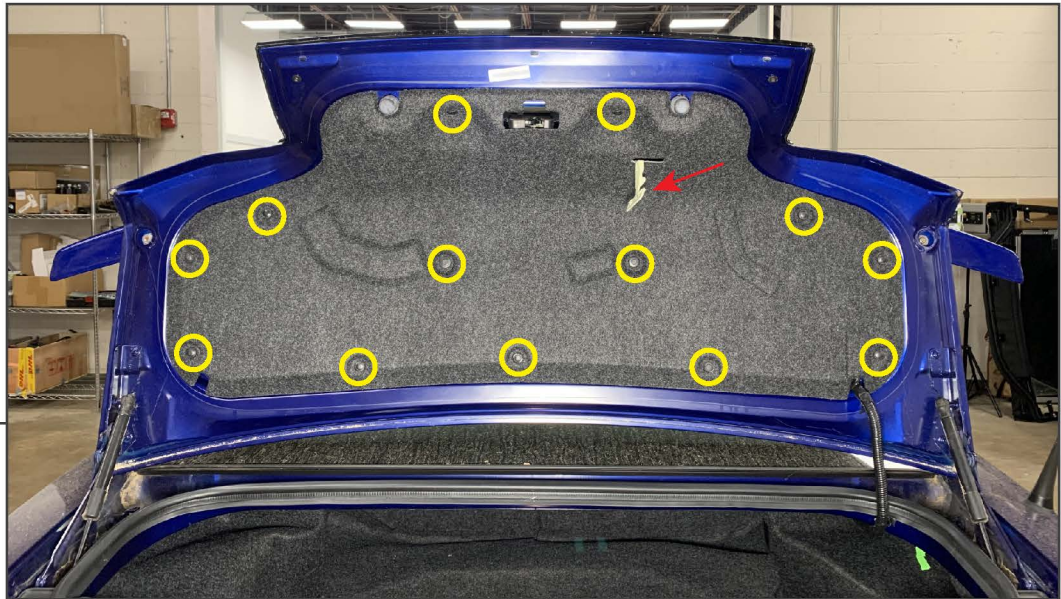

CONTENTS

(1) Third Brake Light Assembly

TOOLS REQUIRED

Panel Removal Tool

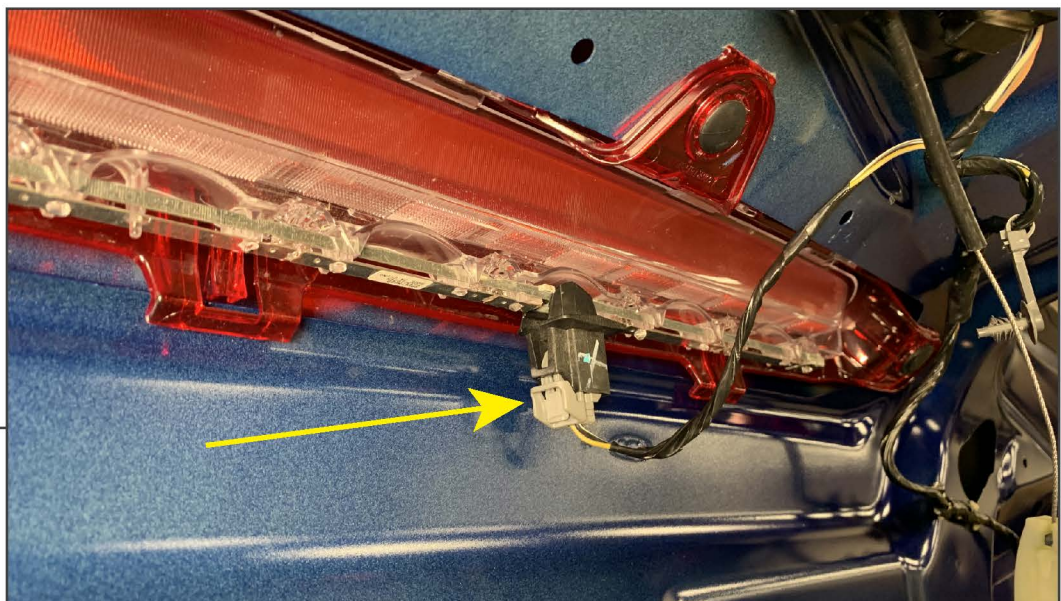

STEP 1

Open the vehicle trunk and locate the trunk insulation panel. Remove (13) plastic push clips from the insulation panel.

Remove the vehicle insulation panel from the trunk, take note to route the emergency trunk release around the insulation panel during removal.

STEP 2

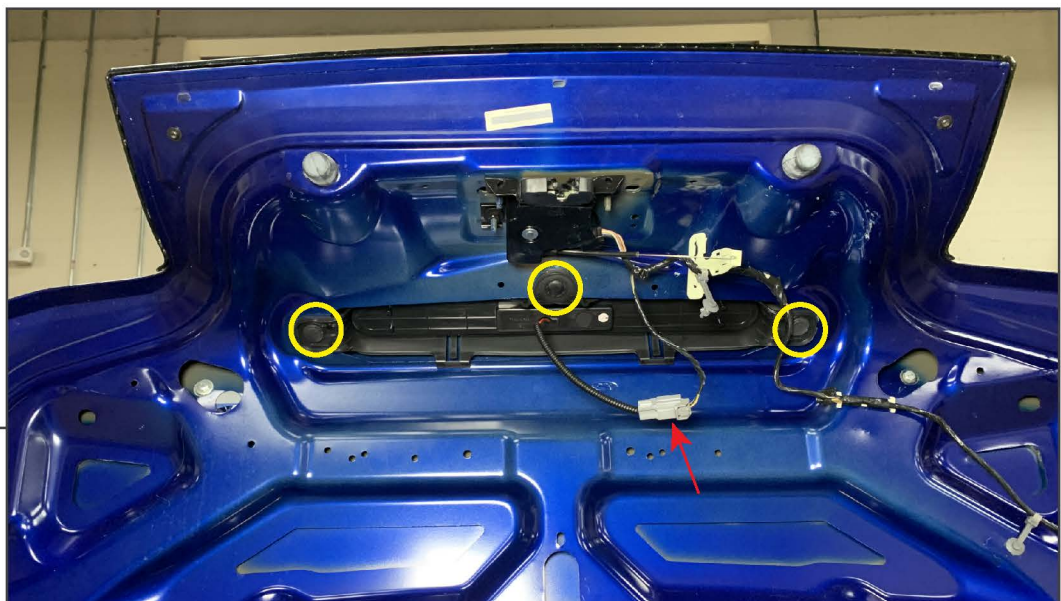

Locate and unplug the third brake light from the vehicle wiring harness.

STEP 3

Remove (3) plastic push clips from the vehicle third brake light assembly. Remove the brake light assembly from the vehicle.

STEP 4

Place the new third brake light assembly into the vehicle, and secure to the vehicle trunk using the original (3) plastic push clips. Plug in the third brake light assembly to the vehicle wiring harness.

STEP 5

Re-install the vehicle trunk insulation panel using the original (13) plastic push clips, ensure to route the emergency trunk release through the insulation panel.

Installation is now complete.
