SKU # 444342 / 444343 / 444344 / 444345 /
444346 / 444347 / 444348 / 444349 / 444350
Edited: 07/23/2024

STEP 1

Turn the vehicle shift knob counter-clockwise to remove the knob from the vehicle.

Note: The shifter knob is tightly fitted to the shifter, loosening will require additional force initially.

STEP 2

Thread the included jam nut onto the shifter shaft. Position the jam nut with approximately 2-3 threads visible under the jam nut.

STEP 3

Thread the new shift knob onto the vehicle shifter, and tighten until the shift knob meets the jam nut.

At this point, test the reverse lockout and ensure proper functionality. If the reverse lockout cannot fully engage, remove the shift knob and raise the jam nut to allow adequate reverse lockout clearance.

STEP 4

Installation is now complete.
