# REAR DIFFUSER WINGLETS

(2024+ MUSTANG)

---

## INSTALLATION INSTRUCTIONS

### CONTENTS

---

(1) LH Winglet  
(1) RH Winglet  
(10) Self Tapping Screws

### TOOLS REQUIRED

---

Phillips Screw Bit  
Drill  
Floor Jack  
Jack Stands  
Exterior Detailer  
Microfiber Cloth

**STEP 1**

Safely lift and support the rear of the vehicle from the ground using a floor jack and jack stand.

Clean the bottom of the rear diffuser/rear bumper with exterior detailer and a microfiber cloth.

**STEP 2**

Identify the LH and RH winglets using the embossed label along the bottom of the winglet.

Once identified, test fit the winglet to the rear diffuser/bumper. The raised section of the winglet will fit flush to the wheel arch. The body line of the winglet will match to the rear diffuser when pressed together.

---

**STEP 3**

Once familiar with fitment, use (5) Phillips screws to secure the winglet to the vehicle rear diffuser. Ensure to space the screws evenly for the most secure fit.

Repeat steps 1-3 for the remaining winglet.

Installation is now complete.
