

S650 STYLE LED TAIL LIGHT

(2015-2023 MUSTANG)

INSTALLATION INSTRUCTIONS

CONTENTS

(1) LH Tail Light
(1) RH Tail Light

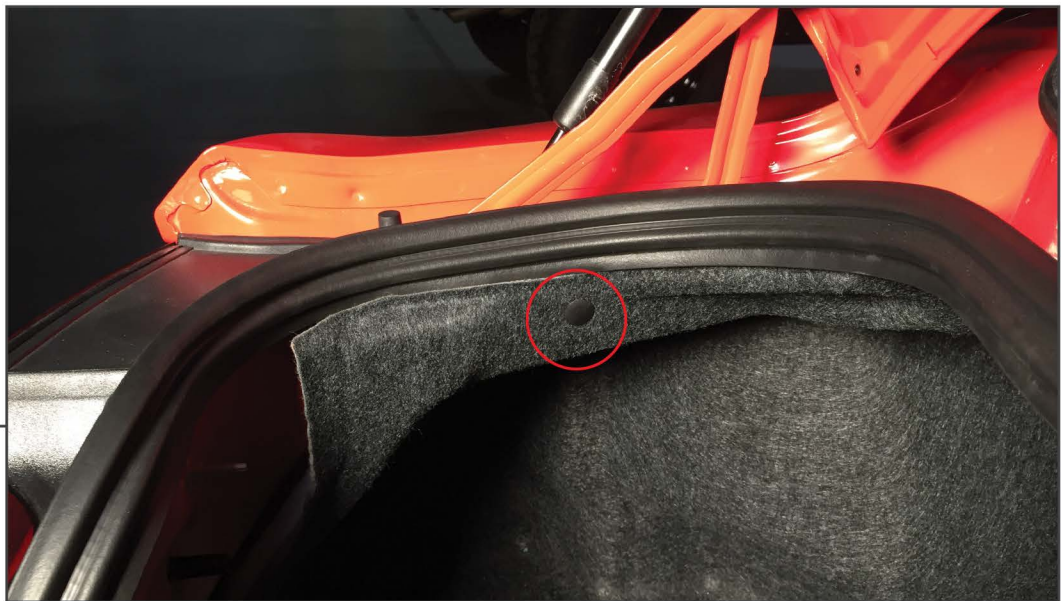

TOOLS REQUIRED

Flat Head Screwdriver
Trim Panel Removal Tool
Metric Socket Set

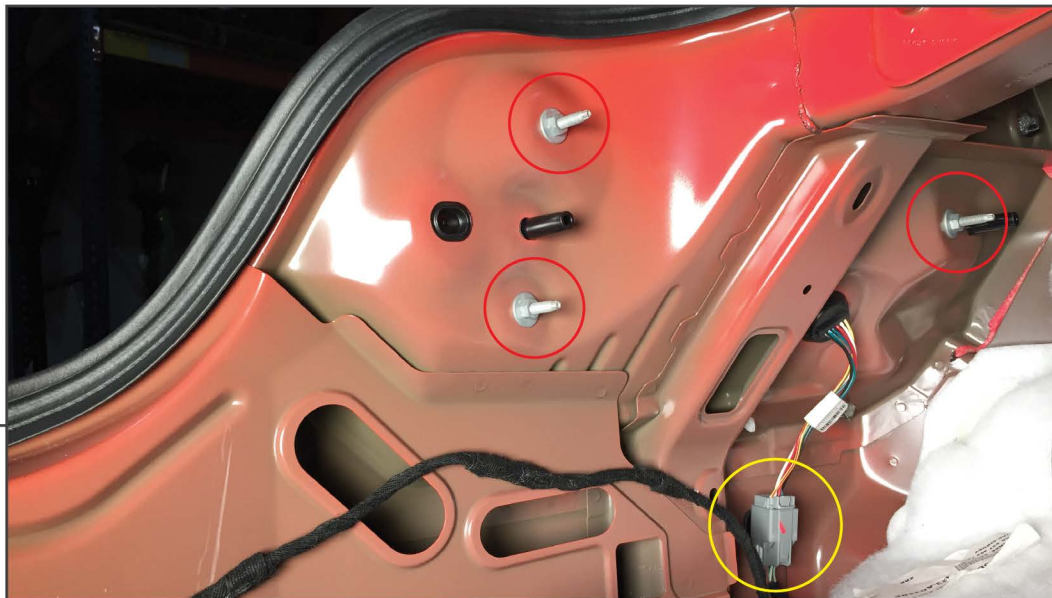

SKU # 465871

STEP 1

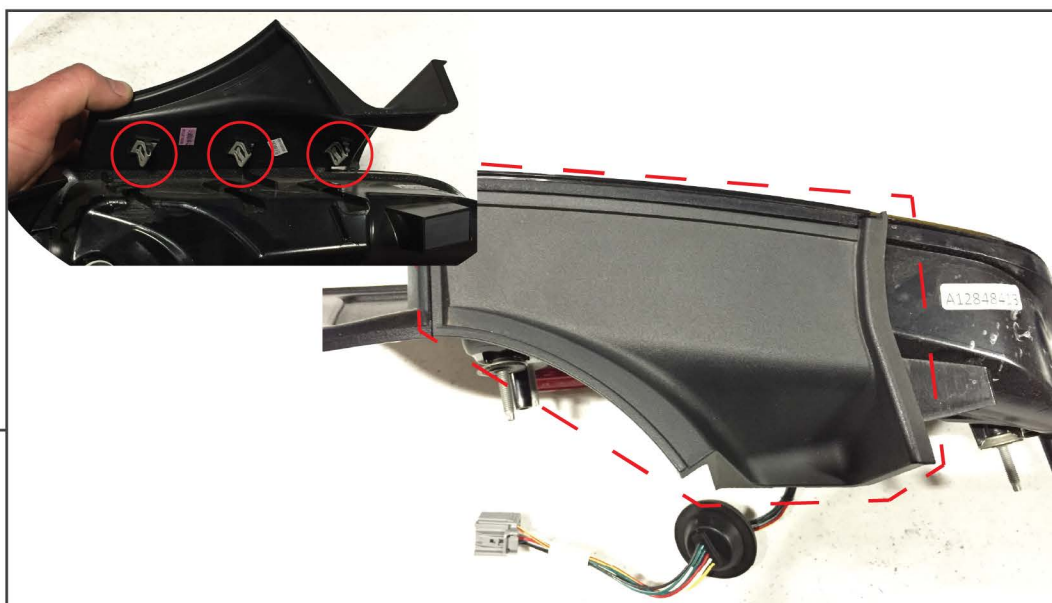

Remove the (4) thumb screw fasteners holding the trunk panel in place. Then, apply slight upward pressure to remove the panel from trunk.

STEP 2

Using a panel removal tool or flat head screwdriver, remove the plastic clip holding the trunk liner in place. Fold back the liner to access the tail light fasteners.

STEP 3

Remove the (3) 10mm nuts securing the tail light to the vehicle. Unclip the tail light plug and remove the light from the vehicle.

STEP 4

Remove the upper plastic trim panel from the factory tail light. Use a plastic trim removal tool or flat head screwdriver and gently pry upward to dislodge the metal clips.

STEP 5

Transfer the trim panel to the new tail light by firmly pressing the panel into place.

STEP 6

Place the new tail light to the vehicle, and fit the harness grommet to the vehicle. Plug the wiring harness into the vehicle connector, and secure the tail light using the original (3) 10mm nuts.

Repeat Steps 1-6 for the remaining tail light assembly.

Installation is now complete.
