

LED REAR DIFFUSER LAMPS

(2016-2018 CAMARO)

INSTALLATION INSTRUCTIONS

CONTENTS

(1) LH Diffuser Lamp
(1) RH Diffuser Lamp

TOOLS REQUIRED

Phillips Screwdriver
Flashlight
Masking Tape

SKU: CC13055, CC13056

STEP 1

Locate the rear diffuser reflector. From under the vehicle, remove (1) Phillips head screw securing the reflector to the diffuser.

Note: Removing the rear mufflers may aid removal, but is not required.

STEP 2

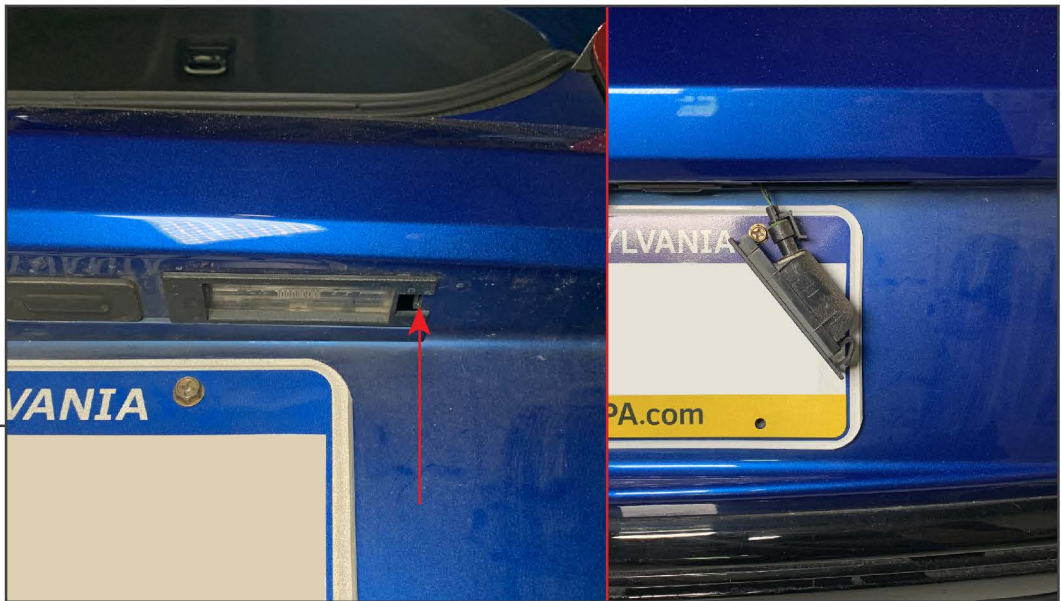

Route the LED rear diffuser lamp wiring through the alignment hole for the lamp housing.

STEP 3

Install the LED diffuser lamp to the vehicle using the original Phillips head screw.

Note: Tape the Phillips head screw to the screwdriver using masking tape to prevent the screw from moving while navigating the screw into the lamp.

STEP 4

Using a flathead screwdriver, remove the license plate lamp housing from the bumper. Splice the rear diffuser light wiring to each license plate lamp following the diagram below. The lights will power on with the license plate lamps using this diagram.

<u>License Plate Lamp Harness</u>	-	<u>LED Diffuser Lamp Harness</u>
Green/Yellow (+)	-	Green (+)
Black (-)	-	Black (-)

STEP 5

Repeat steps 1-4 to the opposite side of the vehicle.

Installation is now complete.
