ORACLE®

2008-2014 DODGE CHALLENGER
SURFACE MOUNT HALO INSTALL GUIDE

REMOVE RADIATOR COVER

TAKE OFF THE RADIATOR COVER BY REMOVING THE FOUR (4) RETAINERS THAT HOLD IT IN PLACE

PREP YOUR HEADLIGHTS:

STEP #1: PREP YOUR HEADLIGHTS WITH AN ALCOHOL SWAB TO CLEAR OFF ANY DIRT OR DEBRIS ON YOUR LENSES

TECH-TIP

OPTIONAL: USE A 3M ADHESION PROMOTER AFTER APPLYING THE ALCOHOL SWAB

THIS HELPS BOND THE TAPE TO THE HEADLIGHTS

- NO BAKING
- NO CUTTING
- NO OVEN

MOUNTING THE HALOS:

2] Start by fishing the Halo wire into the engine bay

3] Remove the top paper layer from the back of the halo

Do not remove the 3M adhesive underneath the paper layer

4] Firmly mount the halo into place and press until a solid bond has formed between the halo & the light

MOUNTING THE FOG LIGHTS

1] Prep the fog light lens with alcohol swabs and optional 3M adhesion promotoer

2] Remove the top paper layer on the back of the fog light halo

Do not remove the adhesive underneath the paper layer

3] Fish the fog light halo wire into the wheel well

4] Firmly mount the fog light halo into place and press until a solid bond has formed

5] Using a panel tool, separate the wheel liner from the front fender

6] Mount your fog light halo driver with either double stick tape or zip-ties

7] Fish the fog light halo wire into the engine bay and close the wheel liner up

MOUNTING THE DRIVERS:

1) Prep your mounting surface with an alcohol pad to clean off any dirt or debris that may be there

2) Using double sided tape or a zip-tie, mount your drivers securely into the engine bay

A good suggestion is the radiator support

3) Connect your LED drivers to their corresponding halos

CONNECTING THE DRIVERS:

This Driver protects the LEDs from voltage spikes and other electrical anomalies that can cause damage to the LEDs but must be installed properly to be effective

ORACLE

- Do not re-wire or bypass the LED Driver. This will cause LED failure and VOID your product warranty
- Never combine multiple LED Devices into one LED Driver
- If the device is not coming on switch the + and - polarity between the Driver and the Device

NOTE: Each Driver is matched to that specific LED Device *DO NOT SWITCH THE DRIVERS*

WIRING THE HEADLIGHTS:

ALMOST DONE!

Option #1- Connect to the parking lights.
This is great if you have white or amber halos that you want to turn on and off by using the factory headlight switch. (Halos will stay on with the headlights).

Option #2- Wireless Controller.
Visit https://www.oraclelights.com/collections/oracle-remotes-and-switches to see the selection of controllers.

Option #3- Toggle Switch.
Visit https://www.oraclelights.com/pages/halo-wiring-faq to see diagrams.

HALOS — DRIVER — GROUND — 3a FUSE — GROUND

Zip-Tie your wires together to keep everything neat
