# ADJUSTABLE REAR CAMBER ARMS

(2008-2023+ CHALLENGER)

(2006-2023+ CHARGER)

---

## INSTALLATION INSTRUCTIONS

### CONTENTS

---

(2) Adjustable Rear Camber Arms

### TOOLS REQUIRED

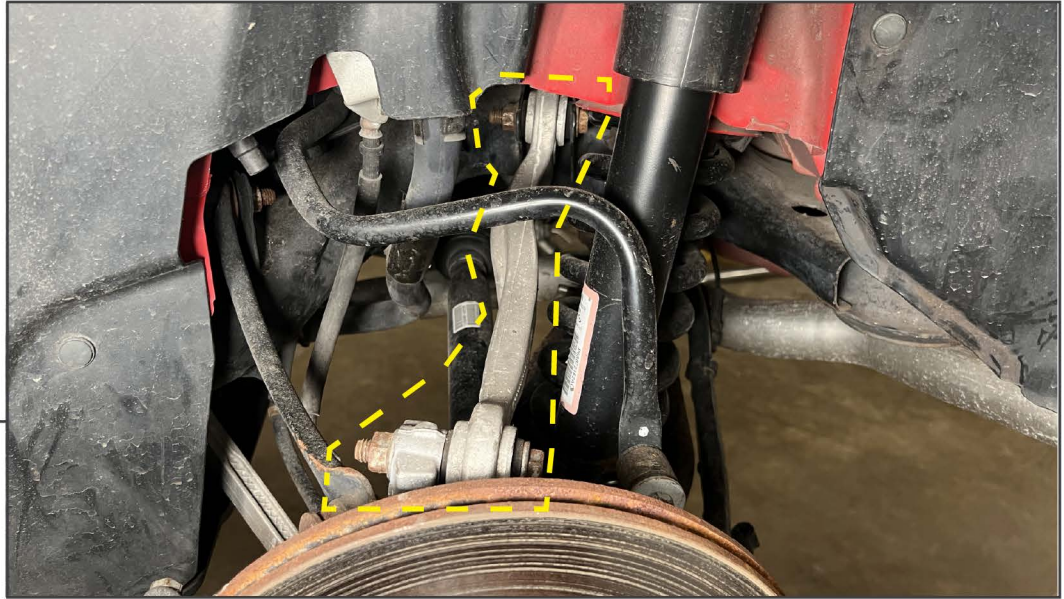

---

18mm Socket/Wrench  
Adjustable Wrench  
Ratchet  
Pry Bar  
Floor Jack & Jack Stands

SKU # CH16303

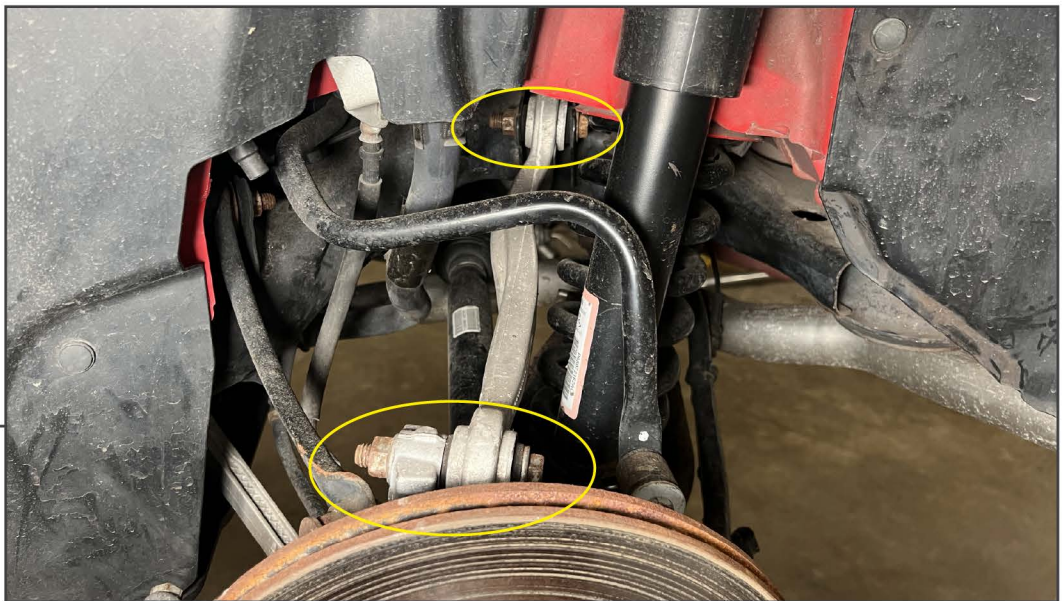

## STEP 1

Safely lift and support the rear of the vehicle using a floor jack and jack stands. Remove the vehicle rear wheel. Locate the vehicle rear camber arm.

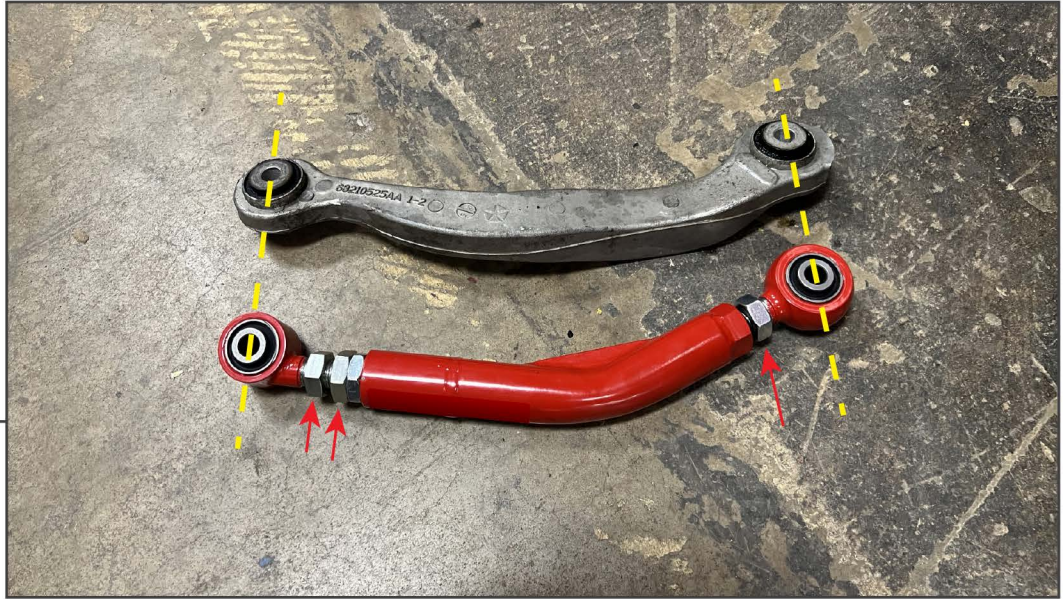

## STEP 2

Loosen the (2) 18mm bolts/nuts from the camber arm. With the hardware loose, use a floor jack to lift the vehicle suspension to relieve pressure from the suspension arms. Then, remove the camber arm bolts, and remove the camber arm from the vehicle.

### STEP 3

Loosen the adjustment points on the camber arm. Adjust the new adjustable camber arm to match the OEM camber arm. Final adjustments can be made once the arms are mounted to the vehicle.

### STEP 4

Using the original (2) 18mm bolts/nuts, secure the new camber arm to the vehicle. Using an adjustable wrench, adjust the camber arm to the desired specification. Once adjusted, tighten the jam nut to lock the adjustment. Professional alignment required to ensure proper handling and tire wear.

Repeat steps 1-4 for the opposite side camber arm. Installation is now complete.
