

REAR DIFFUSER

(2015+ CHALLENGER)

INSTALLATION INSTRUCTIONS

CONTENTS

(1) Rear Diffuser
(1) Tape Roll

TOOLS REQUIRED

-Razor Knife
-Flat Head Screw Driver

SKU # CH3930

STEP 1

This product uses 3M adhesive tape during the installation. For best results install the product when air temperature is above 50°F.

Begin by thoroughly cleaning the rear bumper valance with automotive grade soap and water. Allow the rear bumper and valance to dry completely. Use Isopropyl alcohol to remove any remaining grease, wax, and contaminants.

STEP 2

Apply the supplied tape to the rear of the diffuse as shown. Test fit the part prior to peeling off the tape backing. Once you are comfortable with how the part fits, peel off the tape back.

STEP 3

Ensure the rear bumper valance is clean and dry. Center the diffuser on the bumper and press on the rear diffuser. Apply firm even pressure to tape locations to ensure the best possible adhesion.
